

# STRATUM

Eiris

**shaw** contract®

Designed with realistic wood visuals and grain textures, **Stratum Eiris** with emboss in register provides a beautiful traditional or transitional look and feel with natural variations and visual depth. Stratum offers value and performance through its innovative COREtec® technology. The low maintenance high performing ExoGuard™ finish layer is resistant to scratching and scuffing, while the dimensionally stable layered construction makes installation quick and easy, saving on time and labor cost.

# COREtec®

Stratum Eiris EVT is constructed with patented COREtec® technology that makes it waterproof, dimensionally stable and easy to install. The layered construction delivers real performance and durability, while reducing sound transmission. Designed with locking edges, installation is quick and easy saving installation time and labor costs.

## WATERPROOF

COREtec® commercial is 100% waterproof and can be installed in areas with topical moisture like bathrooms and kitchens.

## SCRATCH RESISTANT

ExoGuard™ Performance finish combined with low gloss and proper embossing provides excellent stain, scratching and abrasion resistance.

## REDUCES SOUND TRANSMISSION

COREtec® features an attached cork underlayment that softens footfall above and below.

## FASTER INSTALLATION

Installs 12X faster than comparable products - Install right out of the box with no acclimation time with little or no floor prep required.

## REDUCES COST

Floating installation allows installation over existing hard surfaces with little or no floor prep. It will not telegraph and will hide many sub floor imperfections.

## NO EXPANSION JOINTS

Superior dimensional stability that will not expand or contract in hot or cold conditions, eliminating the need for expansion joint covers.

## A SOUND SOLUTION FOR MULTI-LEVEL ENVIRONMENTS.

If the space above will experience people walking around, dropping things or moving furniture, a flooring product with a high IIC rating\* will help reduce the amount of noise heard in the room below.

**Stratum Eiris** has an IIC rating\* of 62, resulting in a significant reduction in impact sound floor to floor.

### WHAT IS IIC?

Impact Insulation Class is a measurement of the amount of impact energy absorbed by the product. This test is designed for floor and ceiling materials. A machine taps on the floor repetitively with metal hammers. A device in the room below measures how much of that energy is absorbed or transferred through to the room below.

## RECOMMENDED APPLICATIONS

### Ideal for Living Environments

Hospitality | Multi-Family | Independent Living |  
Light Use Corporate and Retail

	Light	Moderate	Heavy
Foot traffic	<div></div>		
Rolling Loads	<div></div>		
Static Loads	<div></div>		

\*Based on tested ceiling assembly.
