New Product!
DenView500

Is an ingredient view of sales that bridges the gap between polling and a full-blown inventory system

General Features:

♦ Allows users to take previously collected Version 6 reports and calculate the usage on assembled items

♦ Allows business owners to manage their businesses at a fraction of the cost of a high-end inventory module

♦ Can be applied to many kinds of stores including restaurants and bars

QuickBooks Interface

Features of Version 6 Polling

- Save and Send Programs
- Poll Reports
- Communicates direct connect or via modem
- Built in help files
- Users can setup the software to be completely manual to fully automatic using the prompted, script, schedule, and calendar
- Allows users to generate their own end of week and month reports using the consolidate feature
- Allows users to save programs back to their PC from the register, make changes at the PC and then send those changes to the register
- Allows users to take X and Z reports from their PC and save the data for later viewing and easy storage
- Several different report export formats to choose from for interfacing purposes
- Data can be exported from both the report and programming area in comma delimited text file format and select additional formats
- Users can save and edit their keyboard layouts and then send those changes to the register. In addition to the programming, they can also create an overlay with color buttons, color text or icons which can be printed out to place on the register
- Includes options for auto report exporting and printing
- Interfaces with Archive Agent, DenView500, Version 6 Inventory and QuickBooks

Main Screen:
This is the main menu screen. From here users can enter the different areas of the program.

Cashier Detail Screen: This is the detail screen of the Cashier program. This lets you easily set-up and make changes to your Cashier information.

Version 6 Polling Reports

- Poll both Daily and Periodic Reports
- Poll both X and Z Reports
- Store reports on computer for later retrieval
- View and print reports with Zero Skip on or off
- Consolidate reports taken over a range of time
- Print reports
- Export reports in RTF, Excel, or HTML formats
- Automatically export and/or print any report
- Reports available include:

  - PLU
  - Department
  - Cashier
  - Transaction
  - Hourly
  - Plus Many More

Report:
This is an example of a PLU Report with the zero-skip feature on. Reports can be viewed on the computer and printed.

Version 6 Polling Programs

- Two ways to maintain programs: grids for programs with large number of records and easy to understand detailed forms
- Export programs into text files which can be read by Excel, Access and many other software packages
- Print listings of your programs
- Programs available include:

  - PLU
  - Department
  - Cashier
  - Plus many more
  - SRV
  - Graphic Logo 1 & 2
  - Keyboard

Features of Version 6 Inventory

- Update inventory counters by retrieving report data from Version 6 Polling or use Inventory as a stand alone module to track the sale of hard goods
- Grid displays to help users quickly view data
- Customizable print, export and import options
- Support for Single, Six Pack & Case settings
- Modify PLU (Price Look Up) prices in either Polling or Inventory and the other package can easily be updated
- Track PLU stock levels and sales data
- View a complete PLU history including sales, transfers and adjusted items
- Create Purchase Orders
- Set low point re-order triggers
- Collect important report data quickly on item and purchase order status
- Prompting preference to help automate transfers

Super Item Detail:
This is the detail screen of the Super Item function. This allows you to link items like single, six-pack and case together.
