## Create/configure a Connected Car notification

After installing the Car Connector (ADC-3035L), notifications and rules should be created to take advantage of its features.

Before beginning, verify that the Car Connector is installed and added to the account. For more information, see [Car Connector \(ADC-3035L\) - Installation Guide](#).

### To create notifications for the Car Connector (ADC-3035L) using the Customer Website:

1. Log into the Customer Website.
2. Click **Notifications**.
3. Click  next to *Car Event Alert*, *Car Unexpected Movement Alarm*, *Driver Behavior Alerts*, or *Car Started Alert*.
  - If the notification is not created yet, click **+ New Notification** and then click **Cars** and select the specific notification to create
4. Configure the notification as desired.
5. In *Recipients*, click **+ Add Recipient** to select which contacts receive the notification.
6. Click to select the entries in the *Address Book* to be notified.
  - If a contact is not listed:
    - a. Click **+ New** to add a new Address Book entry.
    - b. Enter the new contact's information, then click **Add Contact**.
  - To remove recipients, click **×** to remove the desired notification recipient.
7. Click **Close**.
8. Verify the notification is configured with the desired settings.
9. Click **Save**.
